

TUMMY TUCKER

SUPPORT, SHAPE, FEEL-GOOD

Instructions

- 1) Remove band from packaging and plastic wrap. Unfold your Tummy Tucker so that it is completely stretched out.

- 2) Place band in the center of your back with the velcro hook (the hard part of the velcro closing system) facing inside towards your stomach.

- 3) Next fold the left side of the Tummy Tucker towards your stomach so that the velcro loop (the soft part of the velcro closing system) is facing outwards on top of your belly.

- 4) Next fold the right side of the Tummy Tucker towards your stomach so that the velcro hook snaps onto the velcro loop entirely covering your stomach, hips, and waist. You should have 9-11 cm left on the velcro loop for adjustment as compression progresses.

- 5) For maximum results wear Tummy Tucker discreetly under clothing 24 hours daily and only take off to shower. For maintenance, it is highly recommended that you delicately handwash it once a week. Track your results after nine weeks.

9-11 cm to alter compression as you progress.
