

# IOB-SPEC

Disposable Vaginal Speculum with Built-In Light Source

**Safe**  
**Simple**  
**Bright**

IOB-SPEC is a disposable vaginal speculum with 2 built-in, hands-free, single-use LED light sources. The ready-to-use device eliminates the time and expense of reprocessing and reduces the risk of cross-contamination in the medical setting by eliminating the use of rechargeable and plug-in light sources.

The IOB-SPEC is designed for use on women undergoing a procedure that requires vaginal access and exposure, such as a pelvic examination. It is perfect for clinics, emergency rooms, urgent care centers, and physician offices.
