German Quality Brand

**SaneoTENS** is a digital therapeutic device that helps you to medicate your pain completely without any drugs and side effects. TENS (Transcutaneous Electrical Nerve Stimulation) has been accepted in the world of medicine and has stood the test of time for over 40 years.

In the majority of cases the pain will ease after only a few minutes. This relief usually lasts even after the therapy has been completed. Get well soon!

- 19 programs (3 with individual settings)
- 4 self-adhesive, reusable electrodes (50 x 50 mm)
- 2 separately adjustable channels for medicating several body regions
- easy-to-use

In case of medicating chronic pain the soft electrical impulses, which you will perceive as a pleasant prickle on your skin, stimulate the release of pain-killing, endogenous substances (e.g. endorphins).

In case of medicating acute pain the impulses can block or reduce the transfer of pain sensation to the brain.

- incl. clip for fixing at belt
- large display for good readability
- timer function (automatic turning-off)
- comprehensive safety features
- high quality accessories (incl. 9V block battery)
- certified medical product

#### Technical characteristics

Digital 2 channel system  
 Output: 0 - 60 mA / channel, rectangular, charge compensated, biphasic pulses  
 Frequency: 2 - 120 Hz  
 Pulse width: 150 - 250  $\mu$ s
