

AUTO HEATER/DEFROSTER

Use Instructions:

1. Plug 12 volt vehicle lighter adaptor (included) into car outlet.
2. Place adhesive on dashboard.
3. Place base of unit on adhesive.
4. Rotate head of unit to desired position.
5. Slide OFF/ON switch to Fan position (|) or Heat position (||).

Note: OFF position is (O).

TO DEFROST:

1. Slide head off base and pull handle (located by key chain).
2. Make sure switch is on Heat position and use on outside of windows.

CAUTION:

- This item has a fuse that will turn off in case of overheating. If item should stop working check the fuse and replace if necessary.
- Unscrew tip of vehicle lighter adapter and remove fuse. Replace with 15amp 250v fuse.
