

ActiCuf Frequently Asked Questions

Q: Who can benefit from the ActiCuf Compression Pouch?

A: Any male affected by light to moderate urinary leakage or incontinence can benefit from ActiCuf and return to a more active lifestyle. For example, prostate procedures or other types of surgery can result in temporary urinary incontinence, which can be very troubling. ActiCuf can be an excellent way to manage this surgical side effect. ActiCuf can also be a good choice to manage urinary leakage resulting from other types of male stress incontinence.

Q: Will people notice that I'm wearing the ActiCuf?

A: No. Rest assured that ActiCuf was carefully engineered with this concern in mind. Its unique shape forms naturally to your body. Plus, it's small enough to carry with you, even in your shirt or coat pocket.

Q: How does it feel to wear ActiCuf?

A: The experience of wearing ActiCuf is different for each man. When properly placed, men say it's not very different than wearing a condom.

Q: How long can I wear the ActiCuf?

A: You can wear ActiCuf throughout the day. However, please keep the following in mind:

- Reposition the pouch every 3 to 4 hours (removing the ActiCuf to go to the bathroom is considered repositioning)
- ActiCuf should not be worn while you are sleeping

Q: Can I use a public urinal with the ActiCuf?

A: Yes. Because the ActiCuf is so discreet, you can take it off and put it on again quickly and effortlessly with one hand, without anyone noticing.

Q: Is a prescription required?

A: ActiCuf is a non-prescription item. You can simply order it and start to experience the benefits.
