

Instructions for Use:

Prior to use please read all warnings and instructions on the product label and in this brochure. Perform skin test prior to initial use as outlined below.

Please Note:

Skin test formula for irritation before initial use:

Simply apply 1 drop on the inside of your arm and wait 1 hour. If irritation occurs, do not use.

All products are natural formulas. It is important to follow the instructions and be patient. Initially there may not be any change, please persist with the applications.

To Use:

Tilt the bottle at a 45 degree angle and allow one or two drops to come out. Turn upright and repeat for another drop.

- Discontinue use if irritation occurs.
- Keep out of reach of children.
- Keep away from eyes and mouth.
- If Pregnant or Breastfeeding: Contact a health care professional before use.
- Wash hands thoroughly after each use.

H-Warts Formula

How to Apply: Wash hands before and after use. Shake well and apply 3 times a day. Use 1 or 2 drops on a cotton swab and dab to the top of each wart. Do not oversaturate. It is important not to miss applications.

Plantar Warts: First use a pumice stone to remove the top layer of the wart. Do this only once before the first application.

What to Expect: Warts usually flake away after 2-6 weeks (a little longer for stubborn strains). At first you may not see any change. The formula works from the base of the wart upwards. The warts may get larger, change in color and/or appearance. This is part of the process.

Important: Read Drug Facts before use. ➤
