

# Instructions for Use:

Prior to use please read all warnings and instructions on the product label and in this brochure. Perform skin test prior to initial use as outlined below.

## Please Note:

### Skin test formula for irritation before initial use:

Simply apply 1 drop on the inside of your arm and wait 1 hour. If irritation occurs, do not use.

All products are natural formulas. It is important to follow the instructions and be patient. Initially there may not be any change, please persist with the applications.

## To Use:

Tilt the bottle at a 45 degree angle and allow one or two drops to come out. Turn upright and repeat for another drop.

- Discontinue use if irritation occurs.
- Keep out of reach of children.
- Keep away from eyes and mouth.
- If Pregnant or Breastfeeding: Contact a health care professional before use.
- Wash hands thoroughly after each use.

## H-Moles Formula

**How to Apply:** Wash hands before and after use. Shake well and apply 3 times per day. Use 1 or 2 drops on a cotton swab and dab directly to the moles. Do not oversaturate. Simply allow a thin coating on the surface of each mole.

**What to Expect:** Moles usually flake away after 2-6 weeks, sometimes longer. Be patient and persist with applications.

**Please Note:** The formula is only to be used on benign skin growths.

**Important:** Read Drug Facts before use. ➤
