Regardless of the reasons for hair loss, research shows that discovering the loss early and responding immediately with the right treatment increase the chances of protecting hair health while maintaining hair density and preventing any further loss.

NUTRIGROW

An Unprecedented Protection Against Hair Loss

NUTRIGROW is the first hair loss treatment to show a “Mitotic effect”. Its unique “Mitotic effect” directly influences and increases the production of cells responsible for the production of hair and results in dense and strong hair growth.

NUTRIGROW has a unique patented mineral/vitamin, peptide bearing active complex formed by bonding three essential amino acids to vitamin H (Biotin). The patented active complex of NUTRIGROW returns hair to a healthy growth cycle.

FROM THE CHAIRMAN

Through many years of persistent research on hair loss, we have managed to combine vitamins, minerals and proteins in the right proportions - all too vital for hair growth. During our countless laboratory studies and trials to achieve this unique formula, we discovered the necessary herbs that form complex bonds with these vitamins, minerals and proteins so that they remain as pure and beneficial as if in their own natural environment. This patented complex formula produces unprecedented protection against hair loss thanks to active NUTRIGROW agents combined with special herbal mixtures.

If you are suffering from using traditional products that are just alike and still not getting any results, I strongly recommend that you start using NUTRIGROW, our patented product.

NUTRIGROW is a natural herbal complex suitable for daily use. In fact, you may use it continuously and confidently. It is so pure and natural that it doesn't contain any substances foreign to your hair and scalp.
