Getting Started

1. Begin by removing the E-ZE3 and Power Adapter from the packaging. 2. Locate a suitable location to place your unit. (Ideal Location is an area of the room with good circulation, or near the source of your pollutant.)3. Plug the Power adapter into a wall outlet and then plug the other end into Power Port of your unit.4. Press the Power Button once turn your unit ON (begins in Ionisation Mode). Press it again to change to Purification Mode. Press it one more time to turn the unit OFF. 5. Press the Away Mode Button on the top of your unit to activate the Away Mode (Red Light).
2. Your unit will revert back to original mode after 30 Minutes

3.NOTE: Your unit will revert back to its previous mode after the 30 minutes cleaning cycle has ended. Away Mode can also be activated while the unit is OFF. Once complete, your unit will shut OFF.

Ionisation Mode (Green Light) Ionisation Mode is your unit's default mode. This mode utilises Ionisation ,which charges the particulates in the air until they clump together and fall out of your breathing space. The HEPA filtration with a carbon filter will add to removing airborne particulates such as smoke, pollen and pet dander.

Purification Mode (Blue Light) will in addition to the benefits of Ionisation, P create safe levels of Activated Oxygen(O3), which destroys bacteria, viruses, mold and mildew in the air and on surfaces.

The Away Mode (Red Light) High Power Purification Mode Creates Activated Oxygen(O3) and ionisation for a powerful 30 minute cleaning cycle before reverting back to the previous mode setting .

NOTE:Activated Oxygen can cause temporary respiratory and eye irritation. Keep people and pets out of the space when using Away Mode.

Light

The internal light can be turned ON/OFF by pressing the touch-sensitive Light Button on the top panel.

NOTE: The light will activate for 3 seconds when changing Modes with the light OFF to notify you of which mode is active.

Cleaning:

NOTE: For proper operation the unit should be cleaned at least once per month.

1. Turn the unit OFF and remove the Power Plug.
2. Carefully remove the Filter from the unit. **WARNING:** No Part of this unit should come into contact with water during cleaning.
3. Blow the filter out with compressed air or use a vacuum to remove any dust or debris.
4. Blow the interior of your unit out with compressed air.
5. Replace the filter , Filter Cover, and Filter Cover Screw.

6. Plug your unit in and return it to your previously set mode. If your unit has stopped working properly, if you need help, or have questions contact your dealer.
7. Filter life depends upon the level of pollutants in the space being cleaned. Filters should be replaced once every two months to ensure the highest quality of purification.
