

New Smart Skincare Device Revitalises the Skin - And All You Need is Water!

-Brand-new smart skincare wellness device, Hydrogener8™ Hydrogen Water Mist Sprayer revitalises ageing skin and reverses environmental damage-

November 2019 – Hull-based health and wellbeing company, Savantini Ltd, launch revolutionary skincare device, Hydrogener8™ Hydrogen Water Mist Sprayer, to fight harmful free radicals that enhance ageing and poor health.

The sleek, compact device uses the latest in atomising technology to infuse water mist with hydrogen particles for effective and effortless skin rejuvenation.

Hydrogener8™ Hydrogen Water Mist Sprayer (£59.99) uses electrolysis to saturate natural water with molecular hydrogen. An electric current paired with vibration technology produces hydrogen-rich water in a matter of seconds. Ultrasonic atomising then takes place to reduce the mist into ultrafine droplets that deeply and quickly nourish the skin.

What are the Benefits of Hydrogen Therapy?

Once absorbed into the skin, hydrogen fights free radicals. These are unstable atoms that damage cells and DNA, commonly known for causing illness and ageing. Molecular hydrogen targets and safely neutralises free radicals.

We are exposed to the harmful effects of free radicals every day. They can be generated from pollution (smog, cigarette smoke and even household cleaners), carbohydrates, sugars, stress and a lack of sleep.

Hydrogen works as a powerful antioxidant that defends cells and genes from damage. Your Hydrogener8™ Hydrogen Water Mist Sprayer can be used to:

- Improve skin hydration
- Fight signs of ageing, including fine lines and wrinkles

- Relieve skin diseases, such as psoriasis and eczema
- Reduce acne

Stephanie Taylor, Managing Director of Savantini Ltd, commented:
